THE NEW ONE · LAUNCHED MAY 2026

Key figures

LENGTH	BEAM	PERSONS (YARD RATING)	TOP SPEED
10.85 m	**3.10 m**	**14**	**70 knots**
FUEL	WEIGHT WITHOUT ENGINES	DEADRISE	CATEGORY
700 L	**3,700 kg**	**24°**	**B**

The ACE 360 is the evolution of the 34 NC, the model that made SKIPPER's name. It has been redesigned from top to bottom for owners who want speed with full control, as a day boat or as a tender to a larger yacht.

It combines the AeroQuad™ 4-step hull with the InfinityDeck™ layout: the beam stays almost constant from stern to bow, so there is more usable space and wide walkways to move around while under way.

WHAT SETS IT APART

Rated for 14

The yard certifies it for 14 people. In Spain, as a recreational boat, the limit is 12 passengers.

Planes at ~11 knots

According to the yard, the steps get it on the plane sooner and with less power.

2,155 litres of storage

Integrated storage spread throughout the boat.

Modular protection

Transparent wind and spray protection you fit depending on the day.

WHAT MATTERS MOST

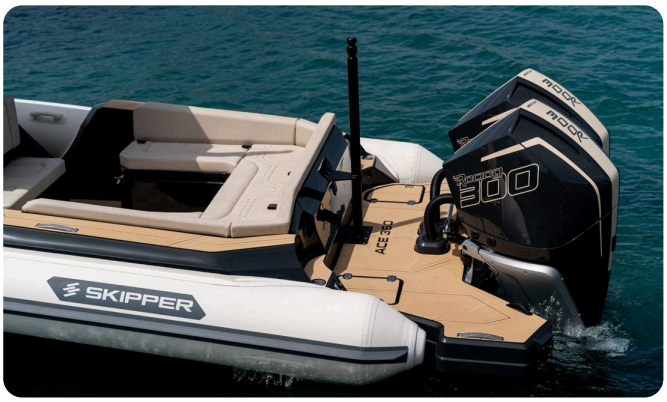

Stable when the sea gets rough

It is the point the yard stresses most. According to SKIPPER, the AeroQuad™ 4-step hull and the 24° deep V are designed to keep the ACE 360 controlled and planted at high speed, up to 70 knots, and to cut through the waves instead of slamming into them: far less pounding than a conventional hull and a drier deck, because the water is pushed outwards.

Licence: PER or higher (Spain) · Indicative ex-works prices, from SKIPPER's official configurator (October 2026). They exclude VAT, transport, registration and the Spanish special registration tax (IEDMT), which applies to boats over 8 m registered in Spain and depends on use and flag. VAT is shown at 21% as a general reference; transport, registration tax (IEDMT) and other costs are set out in your personalised offer. They may change and are not binding: the final price is always the one in SKIPPER's official offer, so ask for your own.

How to buy a SKIPPER

01

We talk

Tell me how you will use the boat and we choose model, engines, colours and extras.

02

Official quote

SKIPPER issues the quote with your exact configuration.

03

Contract with the yard

You sign with SKIPPER and the deposit is paid directly to the yard, never to me.

04

Build and delivery

I follow the build with you and coordinate transport, registration and commissioning.

SEA TRIAL IN GREECE

Try it at sea before you order

There is no demo boat in Spain yet. So we arrange with the yard a visit to the SKIPPER factory in Koropi (Athens) and a sea trial of the model you are interested in. The date is agreed with SKIPPER depending on availability, and I come with you.
